

1. Calculate.

$475 - 245 = \underline{\hspace{2cm}}$

$165 + 47 = \underline{\hspace{2cm}}$

$751 - 28 = \underline{\hspace{2cm}}$

$363 + 145 = \underline{\hspace{2cm}}$

2. Solve the problems.

a) $782 - (105 + 242) = \underline{\hspace{4cm}}$

6) $(191 - 128) : 7 = \underline{\hspace{4cm}}$

B) $539 + (800 - 453) = \underline{\hspace{4cm}}$

1. Calculate.

$475 - 245 = \underline{\hspace{2cm}}$

$165 + 47 = \underline{\hspace{2cm}}$

$751 - 28 = \underline{\hspace{2cm}}$

$363 + 145 = \underline{\hspace{2cm}}$

2. Solve the problems.

a) $782 - (105 + 242) = \underline{\hspace{4cm}}$

6) $(191 - 128) : 7 = \underline{\hspace{4cm}}$
